Updates about Farnham allotments.

Winter 2025

Time to close down!

John Ely A Shepherd and Flock Allotment holder and, along with Pam Bonsor, 2025 winner of the Best Allotment Plot Overall has come up with a list of jobs to do before Christmas!

- Plant garlic in a well-prepared bed, twice the depth of a single clove and 20cms apart.
- Plant onions, peas and broad beans, choosing frost tolerant varieties. If, however, your plot is in a frost pocket like mine, then you may prefer to plant these up in late February.
- Turn your compost heap over to aerate it.
- Give your beds a final weed and mulch them with compost or last year's leaf mulch. Leaves you have collected this year, provided you have shredded them first by running a lawn mower over them, can also be spread over the bed. Earthworms will draw the mulch down into the soil over the

winter months. What's left on top can be raked and used as a base for a new compost heap in the spring.

- An alternative to mulching, particularly if you have a very weedy bed, is to cover them with a tarpaulin or landscape fabric.
- Parsnips can be harvested over the winter. I know supermarkets sell them at a silly price just before Christmas, but home-grown always taste better!
- Clean all tools and tidy up sheds. I am loathe to throw away anything "just in case" but NOW is the time to be ruthless.
- Check all your seed packets – if out of date – throw them away.

Lettuce seeds have 500+ seeds in a packet and you are never going to use them all in your lifetime!

- Over a glass of your favourite tipple, work out what has been a success or a failure and then decide what you want to plant, and where, next year by browsing the seed catalogues.
- Prune summer raspberries, removing this year's fruiting canes, leaving four or five strong canes for next year. Autumn fruiting raspberries can be cut down to the ground after Christmas.
- Blackcurrants, redcurrants etc. can be pruned in February. Remove dead and weak branches to leave an open structure to the bush.
- Although less likely these days, fruit cages with a soft net roof can be destroyed by a heavy snowfall, so best to remove it and put it in store.

A final "push" now is so rewarding and you can "hibernate" with a clear conscience.

Share your tips! 

Every allotment holder has their own way of preparing for winter. What's yours?

We'd love to hear your ideas so we can share them with the wider allotment community. Let's start the conversation with your ideas on how to store produce.

The Wildlife Corner: Share your space with nature

Nature

Farnham's allotments support biodiversity by providing havens for our wildlife. As the growing season winds down, allotments become a vital refuge for wildlife preparing for winter. Hedges, compost heaps, and even untidy corners provide safe passage and shelter for hedgehogs, frogs, and insects, forming part of a network of 'green highways' across Farnham and beyond.

Homemade bug hotel

Homemade bug hotel

- Leave some seed heads standing for finches and sparrows to feast on.
- Build a log or leaf pile to offer shelter for hibernating hedgehogs and beetles.
- Avoid cutting everything back; a little untidiness provides warmth and cover.
- Add a shallow dish of water and check it regularly through frosty weather.
- If you're digging beds, set aside a quiet corner where wildlife can rest undisturbed.

By leaving space for nature, you'll attract helpful pollinators, natural pest controllers, and soil-enriching creatures which will help your plot to be healthier and more productive.

Still growing: a new way to garden

If your allotment is starting to feel like too much to manage, don't hang up your gardening gloves just yet. There's another way to stay green-fingered while easing the workload and that is by joining a 'Friends of ...' gardening group.

These friendly volunteer groups help care for Farnham's parks, open spaces and cemeteries by planting, weeding, and keeping the areas looking their best for everyone to enjoy. There's also a Bloomin' Friends' group which helps with potting on plug plants, planting up the planters and containers in the town centre, making hanging baskets and helping with weeding. Volunteering to be a Friend is lighter work than an allotment but still offers the satisfaction of nurturing plants and seeing nature thrive.

Becoming a Friend is also a wonderful way to meet new people, share gardening knowledge, and stay active outdoors. Even a few hours a month can make a real difference and you'll still get your gardening fix without the full commitment of a plot!

Interested?

Contact us to find out how to get involved.

If you are struggling to maintain your allotment or you've noticed that a neighbour hasn't visited for a while and their plot is overgrown, please let us know so we can help get things back under control.

Plot marker signs

As part of your tenancy agreement, it is necessary to display your plot number in a prominent position on your plot. To help you with this we have pulled together some ideas of how you can display your plot number.

Ideas for plot markers

Bin stickers on your shed/ water butt/ greenhouse:

cheap, cheerful, and probably the quickest solution. Grab some bin stickers next time you are at a shop, you might even be able to donate the numbers you don't need to a neighbour.

Wooden sign:

use some reclaimed wood to display your plot number on. You could use paint, or give pyrography (wood burning) a go. Give it a varnish afterwards to help seal it.

Mosaic on a baking tray:

this plot holder has integrated their plot number into a mosaic, mounted onto a baking tray. Whilst this is more work it is very eye catching and unique.

Recycle old items:

get arty by reclaiming old items to upcycle into plot markers. This plot holder spray painted an old spade, and propped it up in some pipe. This can be a quick simple project to do, and is a great way to reuse things that would otherwise be thrown away.

Know your Site Rep

Site Reps act as the vital link between plot holders and Farnham Town Council, helping to share information, raise issues, and represent their site at Allotment Liaison Group meetings.

► Gardeners' Questions: Top tips from the experts

This summer, John Ely from the Shepherd & Flock allotments, gardening expert John Negus - described by *Amateur Gardening* as a true legend - and naturalist Jeanette Hatto took to the stage for our lively Gardeners' Questions event.

For an hour, the panel fielded questions from the audience, shared their experience, and swapped plenty of down-to-earth advice.

Their top tips for allotment holders this year included:

- Grow only what you'll eat – it saves time, space, and effort.
- Mulch now with compost or last year's leaf mould so worms can pull the goodness into the soil over winter, improving its structure naturally.
- And from David Wheeler at the Shepherd & Flock site: "Little and often" – the golden rule for keeping on top of your plot without feeling overwhelmed.

A fun, practical session full of inspiration for every gardener.

Bonfire season

It's bonfire season again which means allotment holders are welcome to have a bonfire on their plot but please wait until after dusk before lighting it.

To help protect hedgehogs and other wildlife, always build your bonfire on the day you plan to light it. Avoid stacking it in advance or on top of piles of leaves, as these make tempting hiding places for small creatures.

Choose a clear patch of ground, keep a bucket of water nearby, and never leave your fire unattended. Stay safe this season.

Farnham reaps a golden harvest at the In Bloom Awards

Farnham in Bloom enjoyed a bumper crop of success at this year's South & South East In Bloom Awards, held at RHS Wisley. The town brought home five golds, including:

- Gold and Best in Category – Farnham Town Centre
- Gold and Best in Category – Hale Cemetery
- Gold and Champion of Champions – Badshot Lea Cemetery
- Gold – Gostrey Meadow
- Gold – West Street Cemetery

In addition, Badshot Lea Bloomers, The Bourne Conservation Group, and space2grow were recognised as Outstanding in the It's Your Neighbourhood category.

Led by Farnham Town Council and supported by volunteers, schools, and local groups, Farnham

The Mayor of Farnham with Farnham Town Council's Farnham in Bloom team.

In Bloom continues to promote environmental care, wildlife-friendly planting, and community pride.

To get involved in Farnham in Bloom 2026, email bloom@farnham.gov.uk.

Reminder to allotment holders:
Dogs are not permitted on the allotments unless you have written permission from the Town Clerk. Please respect this rule to ensure safety and enjoyment for all.

Prize-winning plots!

The Farnham in Bloom Community Awards took place at the end of October and were a celebration of horticultural achievement. In the allotment category the standard was particularly high with the following prizes being awarded:

Best Plots on each site

Farnborough Road - David Boakes
 Morley Road - Liz Clifford
 Shepherd & Flock - John Ely
 Six Bells - Brett King
 Wrecclesham - Susan Mcdermott
 West Street - Sue Ware
 West Street Extension - Penny Simmons
 Alderley Farm - Joan Jack
 Overall Winner – John Ely
(Pictured below)

Newcomer Awards

Farnborough Road -
 Howard Kaye

Wrecclesham -
 Steve & Octavia Bell

West St Extension - Luke Burton

Alderley Farm -
 Warren & Alisa Lindsey

Overall Winner - Howard Kaye

Best Allotment Plot Overall -
 John Ely & Pam Bonsor, Plot 10
 Shepherd & Flock

Best Newcomer Allotment Plot Overall - Howard Kaye, Plot 18
 Farnborough Road

Congratulations to everybody who took part and thank you to the sponsors which include Gold sponsors The Patio Black Spot Removal Company Ltd, BBS for Magimix, Cala and Squire's Garden Centres.

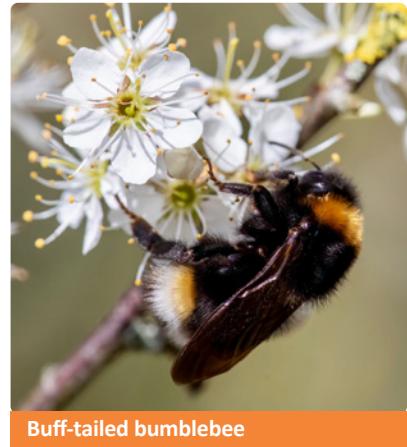

Let's look after our bees! *By Juliet from Hive Helpers*

Hive Helpers is based at Farnham Community Farm which runs a veg bag scheme. Our honey bees help pollinate the farm's veg, but we're not just about honey bees!

We work to raise awareness of all pollinators through beekeeping and nature conservation. Did you know there's just one species of honey bee in the UK, but 26 bumblebees and over 250 solitary bees, and many of them will be helping to pollinate our fruit and veg?

Honey bees are very efficient pollinators, and whilst they are generalist feeders (meaning they can forage on a wide range of plants), they like to forage on a single species at a time. They can fly relatively long distances to access a single crop, such as oilseed rape. They collect nectar to turn into honey stores to sustain the colony over winter, and pollen to feed their brood which they collect in 'pollen baskets' on their legs.

Bumblebees have much smaller colonies than honey bees, and do not make honey stores because their nests normally die out over winter, with a new queen emerging from hibernation in spring. They still collect nectar to feed themselves and pollen for their offspring, which they pack into their pollen baskets, like honey bees. They can pollinate a wide variety of flowers because they have different tongue lengths – short tongued bumblebees forage on open flowers with easily available nectaries such as courgettes, whilst long-tongued bumblebees can access tubular flowers like foxglove and honeysuckle. Bumblebees are brilliant at pollinating tomatoes (in fact, they're the only pollinator to do so) using a technique called 'buzz pollination'.

Buff-tailed bumblebee

Solitary bees do not have the range of honey bees, meaning they stay closer to home where there are nesting sites and forage. As their name implies, solitary bees do not live in colonies, but lay their eggs in a single 'nest' which could be a tunnel dug in bare earth (mining bee), a hollow stick (mason bee), or a cavity in rotten wood (carpenter bee). Eggs are provisioned with pollen - to feed the growing larvae once they hatch – then left to their own devices, to pupate, wait out winter, and emerge in the spring. Solitary bees are very good pollinators - they do not have singular, tidy pollen baskets, but collect pollen on hairy body parts, dusting it everywhere in the process, which allows them to pollinate some crops very efficiently!

Most honey bees live in hives managed by beekeepers. Bumblebees and solitary bees are wild pollinators so have to manage by themselves, and, like many insects they are in serious decline. Habitat loss, pesticide use and climate change are the main factors causing this decline.

We can help them by providing shelter, nesting opportunities such as hollow tubes and bare patches of earth, and a wide variety of plants for forage. By encouraging a wide range of pollinators onto your allotment, you will ensure better pollination and higher yields.

New flower beds bring sense of calm outside Central Surgery

A vibrant transformation has taken place outside Central Surgery in Farnham with freshly planted flower beds now welcoming patients and passers-by.

Farnham Town Council worked with Waverley Borough Council and the surgery to breathe new life into the neglected flowerbeds which were heavily overgrown with alkanet, bindweed and thistle.

Explaining the inspiration for the project, Dr Martin Ballard said: "Inside the surgery, we have a variety of easy-to-clean and low-maintenance houseplants, which have attracted many positive comments from patients.

We wanted to ensure the outside space was just as welcoming.

Councillor Mat Brown, Lead Member for Environment says: "We were delighted to help Central Surgery with this project and in just four days, the space was totally revitalised. The garden will be maintained by a Friends group from the surgery and is an excellent example of the partnerships that make Farnham in Bloom such a success. I'm really looking forward to seeing the flowers bloom – it will make for a stunning display as you come into Farnham."

If you know of a business in Farnham that is looking for team volunteering opportunities, please encourage them to contact Farnham Town Council.

Calling all budding authors!

Think you've got a novel idea worth sharing? Enter the Farnham Literary Festival's First Five Pages Writing Competition and put your story to the test!

Entrants are invited to submit the first five pages of their novel, along with a 250-word synopsis. The winner will receive the prestigious PARIS PRIZE FOR FICTION, which includes £1,000 and a professional critique from literary agent Katie Fulford of Bell Lomax Moreton.

The first prize money is generously provided by B.A. Paris, New York Times and Sunday Times best-selling author, who will also serve as one of the judges.

The deadline for entries is 31 December 2025. For details visit: farnhamliteraryfestival.co.uk

Music in the Vineyard

Farnham Town Council's *Music in the Vineyard* returns in January and offers free monthly concerts to bring the community together through the winter.

The concerts take place on the last Sunday of January, February and March from 3-5pm at The Vineyard Centre, Union Road. They feature a variety of live music including jazz, folk, pop, and brass bands. Music in the Vineyard is free to attend. You can enjoy homemade treats and warming drinks from the charity refreshment stand or you can bring your own.

➤ All change for local councils

Big changes are afoot in Surrey following one of the biggest shake-ups in local government for more than half a century.

In the autumn, the government announced that Surrey's county council and 11 district and borough councils will be replaced by two new unitary authorities. Elections will take place in May 2026 ahead of Waverley and Surrey being dissolved in April 2027.

Farnham is in the West Surrey unitary authority along with the existing Guildford, Runnymede, Spelthorne, Surrey Heath and Woking boroughs.

Although town and parish councils have not been included in the local government review, the reorganisation provides opportunities for Farnham to enter discussions with Waverley and Surrey about the transfer of assets and services which are important to the community.

Waverley is currently considering transferring several green spaces to Farnham Town Council so they can be managed locally and continue to be owned by the town.

Further information about the changes can be found at www.surreycc.gov.uk/council-and-democracy/lgr

Say it with flowers in 2026

Do you run a business in Farnham? Would you like your business to be proudly associated with the award-winning Farnham in Bloom? We are now seeking sponsors for 2026, with a range of packages to suit businesses of all sizes and budgets.

If you are a town centre business, you can welcome customers with a beautiful hanging basket right outside your premises. For £90, we will:

- Supply and hang a fully planted basket
- Maintain and water it throughout the summer
- Help you stand out as business that cares about the local community.

For greater visibility, you could sponsor a statement planter in a prominent town centre location. As passersby stop to admire the display, they'll also see your:

- Business name
- Logo
- Contact details displayed on a smart sponsor plaque which we'll provide.

Larger companies may be interested in our Principal, Gold and Silver sponsorship packages. These offer:

- High profile association with Farnham in Bloom
- Support for local environmental projects
- Involvement in community initiatives that promote wellbeing and pride of place.

Interested?

We'd love to help you grow a sponsorship package that works for your business. Contact Lucy or Lara at bloom@farnham.gov.uk.

Gostrey Meadow improvements

Phase two of the improvement to facilities at Gostrey Meadow are set to begin in 2026.

This next phase will see the construction of a new amenity building which will include new toilets and storage for the equipment which is needed for the many events held at Gostrey Meadow. There will also be more play equipment installed for pre-schoolers including a sensory Lions' Den and a small water play area.

Love where you live

Litter picking is a simple way for residents to make a visible difference in the area where they live. Regular, small-scale litter picks help keep streets, paths and green spaces clean, reduce environmental harm, and improve the overall appearance of neighbourhoods.

If you love where you live and can spare some time to carry out occasional or regular litter picks within your neighbourhood, we would love to hear from you.

Litter picking could be combined into a short walk once a week or a monthly tidy-up of a particular street, green space or footpath.

What's involved

- Choose where and how often you litter pick
- Picks can be done individually, with neighbours, or as part of an informal group
- Most people find that 30–45 minutes is enough to make a noticeable difference

All volunteers are provided with:

- Litter pickers
- Gloves
- High-visibility vests
- Bags and advice on safe disposal

Collected litter can be left at agreed locations for council collection, or disposed of as advised.

How to get involved

If you are interested in volunteering in your area, please email Lucy or Lara at bloom@farnham.gov.uk.

Ten things you can do on Farnham Town Council's new website

Visit www.farnham.gov.uk to:

1. Explore essential local services

Head to the 'Our Services' section to apply for a grant, view planning applications, see links to traffic cameras and information about Farnham's cemeteries.

2. Report community issues

Through the 'Report It' feature, you can notify Farnham, Waverley and Surrey councils about various concerns ranging from potholes and overgrown hedges to missed bin collections and graffiti.

3. Stay informed with democracy and transparency

The site provides access to council agendas, dates of meetings, minutes, councillors' contact details, spending over £100, audits, budgets, and grants awarded.

4. Apply online

Save time by applying online for a grant or job or to hire the bandstand at Gostrey Meadow. You can also send an invitation to the Mayor and apply to be a stallholder at an event.

5. Find 'Things to do'

Under 'Things to do', you'll discover local attractions, events, cultural spots, festivals, outdoor activities, shopping, and itineraries - perfect for residents and visitors planning their day or weekend in Farnham.

6. Use the directory of local businesses and services

Looking for a local tradesperson or service provider? The Farnham Directory connects you to local businesses and organisations. Farnham businesses, organisations and clubs can add their details for free.

7. Find what's on

Visit the events calendar to find out what's happening in Farnham. Organisers of Farnham events can add details for free.

8. Visit Farnham

Coming to Farnham for a visit? Hop on the 'Visit Farnham' pages for details about accommodation options, travel tips, traffic and roadworks updates, and details on nearby villages and twin town.

9. Receive newsletters and updates

Subscribe to the enewsletter so you can stay in the loop with town council bulletins, event announcements, and key community information—sent straight to your inbox.

10. Discover Farnham's roots

Delve into Farnham's rich 'History and heritage' for a tale that stretches back to the stone age yet remains vibrant and visible today. Explore Farnham via the Heritage Trail, find out more about Farnham's Hidden Heritage and the famous names who have achieved great things.
